Learning Outcomes/Competencies

1. Students will learn about the historical development of Public Personnel Administration and the origins of the Civil Service system employed by Public Safety Department. Students will review current Federal, State and Local statutes as they impact the area of Human Resources. Students will develop an understanding of how these statutes and Court cases impact the way their Departments deal with their most valuable resource, their personnel. This understanding will be accomplished through lecture and in class discussions with the students.
2. The development of effective recruitment, hiring and promotion practices will be discussed and students will learn the importance of conducting job related, valid and reliable hiring and promotion procedures. Utilizing their current rank/position students will be required to identify the tasks performed for that position and then identify the requisite knowledge, skills and abilities required to effectively perform those tasks. This will be done through the submission of a written assignment listing 5 tasks performed by that position and the knowledge, skills and abilities necessary to accomplish this task. By completing this assignment students should be better prepared to compete in promotional examinations and gain an understanding of how promotional examinations are developed.
3. Students will learn that Public Personnel Administration is a product of over a century of scientific and academic study leading to legislation dealing with all aspects of Human Resource Management. The field of Human Resource Management has also been significantly impacted by U.S. Supreme Court and state court decisions. Students will be introduced to significant legislation such as the Civil Rights Act of 1964, the Age Discrimination in Employment Act, The Americans with Disabilities Act, the Fair Labor Standards Act, and Civil Service laws. Students will be required to research and prepare an in class oral presentation on an assigned court case of consequence dealing the courts' interpretation of Human Resource Legislation.

4. The discipline of Public Safety personnel will be discussed in depth and the rights of law enforcement officers established by legislation, collective bargaining agreements and US Supreme Court and State Court decisions will be examined. Several court cases of consequence will involve students making oral presentations in class. Students are expected to develop an understanding of the disciplinary process as it involves them and those that they may supervise now or in the future.
5. Collective bargaining in the public sector will be discussed. Students will learn about the collective bargaining process, ways to resolve impasses and what rights may be afforded to them as a result of their collective bargaining agreement. Students will be required to complete a written assignment dealing with the disciplinary process for their department and specifically what rights are granted to them by department directives or their Collective Bargaining Agreement.
6. Student will learn about the Fair Labor Standards Act and how that act impacts their pay.

Learning strategies: The course will rely on lectures, in class discussions and assigned court case research which the student will use as the basis for an in-class presentation on the importance and relevance of the court case finding for this class.

Experimental Learning Opportunities: Students will be required to research an assigned court case of consequence and make a presentation in class on the case. The research is designed to acquaint the student with the process of finding court cases based upon appropriate citations and then understanding the decision well enough to make an oral presentation on the finding in class.
