In addition, effective supervisors must possess the leadership and team skills necessary to supervise an increasingly diverse workforce. This course explores topics such as leadership, motivation, team dynamics, organizational structure, culture, conflict, communication, decision making, planning and labor relations. The course will emphasize the distinctions between the various levels of management. We will examine team dynamics and effectiveness, trust and how it is built or destroyed, conflict and how it is managed in different situations.

Learning Strategies:

Learning strategies for Supervision Management have been designed with adult learners in mind. Adult learners approach learning with specific goals, want to be able to directly apply new learning to their work and personal lives, and tend to learn best when the coursework is problem-centered so that they are actively engaged in the learning process. In addition, adults bring rich and varied experience to the classroom, which becomes a valuable learning resource for other students. The activities and assignments in this course build on the shared experience of every class member. This is why each student's preparation, participation and interaction in class activities and discussions are critical to the success of the course.

Experiential Learning Opportunities:

Known as one of the most effective books on management, *Supervision Today* helps students build an understanding of supervising through real-life concepts, examples, and practice. It's lively, conversational tone and full-color design engages students and helps capture the reality and excitement of the supervisor's job. Using a "student-friendly" approach, *Supervision Today* covers the essential and traditional elements of managing others with a strong focus on applied and practical skills. The Eighth Edition continues to be rich in instructional aids and experiential opportunities. Concentrating on the evolving roles supervisors must embrace in the current work environment, *Supervision Today* includes new information on employee engagement; sustainability; technological advances; work, life, and family balance; workplace diversity; supervising global teams; and more.

7. **Fight** – learn to “fight for your life” by utilizing everything you can use as a weapon.
8. **Forget about getting shot – fight!** You want to buy time to distract the shooter to allow time for emergency responders to arrive.
9. **Aim high** – attack the shooter in the upper half of the body: the face, hands, shoulder, neck.
10. **Fight as a group** – the more people come together, the better the chance to take down the shooter.
11. **Whatever you do, do something** – “react immediately” is the better option to reduce traumatic incidents.
